Queensland Minecraft

Queensland Minecraft was an online virtual platform used by libraries for a wide range of activities, events and programs as well as being available for its users to challenge themselves in a large community-driven role-playing game.

The program ended at the end of 2020.

Since its closure, the <u>Drustcraft</u> server has been created by staff and players to ensure that the Queensland Minecraft community and spirit lives on.

Guides

You can find some how-to constructions guides on the Minecraft wiki page.
