

KANO

SLQ Wiki Fabrication Lab 2024/10/04 08:00

KANO

Kano is a computer anyone can make. Kano's mission is to give young people – and the young at heart – a simple, fun way to make and play with technology, and take control of the world around them.

When you build your own Kano computer, you get a real computer, powered by Raspberry Pi 3 and Kano OS. You get all the apps and programs you need. You get a powerful learn-to-code tool, designed to unlock potential, and unleash creativity.

Recommended Ages	Year 3 to 6 (ages 9 to 12)
Product Cost	KANO Basic Set \$340-\$370 KANO Complete Set \$480-\$530 Additional Coding Kits \$150-\$200

Product Requirements

- The Basic set requires a HDMI capable display

Loanable Kits

State Library has kits of this item available for loan to libraries within the Regional Libraries Queensland and Indigenous Knowledge Centres network. Libraries can place a reservation through the Aurora catalogue (availability is subject to existing reservations, loans and associated return dates).

The kits are for use by patrons within the library only, as part of supervised library programming. They will not be listed in the public online catalogue for personal reservation.

Please contact [Access Services](#), or phone 07 3842 9014 with any queries.

Kit Contents

- 4 x KANO Complete set

Tips

Resetting Kano OS to Factory Settings

If you want to pass on the fun and give your Computer Kit to someone else, it's easy to remove your data and restore it to factory settings.

- Find the Terminal app on your Kano dashboard.
- From the command line, type `sudo kano-init reset` and press enter.
- If it asks for a password, type `kano` and press enter.

That's it! Your Computer kit will be reset to factory settings the next time you start up the computer!
