Accessibility: Simon

Simon's eyesight isn't as good as it was and he has trouble reading text on a computer screen. Sometimes he gets the words mixed up.

Simon has discovered that he can read white text on a black background better than black on white. At home he's got an old laptop, which he used regularly for web browsing until it started giving him headaches.

Supporting Simon

Based on Simon's profile above, suggest some accessibility resources or strategies to assist him with his online experience.
