<b>What did you think was successful about the workshop?</b>	The most important thing about this workshop was that people came back and we were able to progress the process.	hopefully this will mean that we can continue to gain some momentum and attract further engagement by community
<b>What did you learn about the workshop?</b>	again its not easy to "take people thru content" when they are expecting the participatory style interaction of a "workshop" this is why this community page may be handy to share blogposts, idea boards or info. People can then read add to this content prior to the workshop and then discuss in the workshop
