

Community Session 1

SLQ Wiki Fabrication Lab 2026/04/27 04:36

Community Session 1

These sessions focus on building and strengthening a making community. This one occurred on Thursday 8th March 9.30-11.30am

Materials needed

- hand tool area set up
- induction paper work
- photo consent forms
- cardboard making area
- computers for digital design
- camera for taking photos

Preparation

This is the first session with multiple groups and generations present. Things to consider:

- music in the space to make everyone relax. Remember to have a playlist that will be relevant and appropriate.
- introduce the different spaces available as well as what we will be doing today.
- allow for group intro's as well.

The Plan

After introductions to the space and each other

Hand tools induction- where everyone will complete an induction and make a name badge

Once everyone has completed the induction we will all move onto viewing and discussing the Kaiju design.

Then solo or in pairs work with cardboard to make a small detail from the Kaiju design.

solo or in pairs move to the computers and turn the cardboard design into a digital design. This process will be lead by Mick.
