## Fabrication Session 3: Troll and Catamaran

During this session two of the people who came along to the design session were also coming to the fabrication session to work on making the designs that they worked on - handbag and catamaran. Both commented on how great it was to see their design through to the finish. They both said that they learnt heaps about the translation of an idea into fabrication as well as working with materials.

Work was also done on the troll fairy as well as finishing off the ant people heads.
