

Making a Sign: Finish Assembly

SLQ Wiki Fabrication Lab 2026/06/11 10:30

Making a Sign: Finish Assembly

Prep

Before the session do the following:

- Work on the layout for cutting
- Cut and trial the paint

(offer a working bee session/s outside of these formal sessions for anyone that would like to join in the cutting and painting)

Plan

- Assemble
- Paint all the components
- Rig lights

Actual

The sign making process extended out to more working bee drop in sessions after this one.

The background texture (corrugated cardboard hexagon shapes) ended up taking a lot longer than one might have thought. There was a corrugated pattern that was established and many hexagons to cut.
