Pluto Whispering Booth

Idea brief

This is the idea brief that designers worked from

[pluto_whispering_booth_idea_brief_ggr_project.docx](#)

Design generated

This is what was generated during the design session:

4 metres wide

4 metres deep

2.2 metres high

Internal structure is wrapped in cardboard paper mache technique.

3 x speaking holes (almost hidden from outside)

1. far front right

2. far front left

3. back in the window

Separate structure to the side that is 600x 1 metre x 2.2m high

People can only engage with the outside or the inside if they have the Ant people headdress on.

Considerations: the step at the back of the window bay

Lights may be needed inside to see as well as light up where the whispering microphones are
