

# **Preflight checks - getting the Machine ready to cut**

**SLQ Wiki Fabrication Lab 2024/08/28 06:21**

## Preflight checks - getting the Machine ready to cut

- Is there a hot work permit in place?
- Is there room in the extraction bag for your saw dust?
- Check the required tool is in the machine and is secure?
- Has the tool been qualified?
- Has the machine been homed?
- Are the required Vacuum bed zones are turn on?
- Is the material secure on the bed?
- Have you loaded the right cutting file ( Preview File on the A2MC console)?

### Check with the Fabrication Lab Supervisor before cutting
