

# Daily Setup

SLQ Wiki Fabrication Lab 2026/04/24 13:21

## Daily Setup

1. Switch on power supply
2. Check that Flexible Steel Print Sheet is clean and damage free
3. Run **Daily Setup Check** script (found in the testing folder on the SD card) this will run a Z axis calibration extrude and print a small test print.

This is an operation for Level 2 inductees and above only
