Daily Setup

SLQ Wiki Fabrication Lab 2025/12/03 20:25

Daily Setup

- 1. Switch on power supply
- 2. Check that Flexible Steel Print Sheet is clean and damage free
- 3. Run **Daily Setup Check** script (found in the testing folder on the SD card) this will run a Z axis calibration extrude and print a small test print.

This is an operation for Level 2 inductees and above only
