> Prototype Workshops

This is an easy-to-access space for HtE members or other volunteers to write up workshops they are interested in either doing, have done or just want to document.

Once complete to your satisfaction, it can be moved into the main [workshops:prototypes:](#) page before being released as a [public workshop](#).

To begin development start by making a new page in the box below. This will make a new page in this namespace, and it will use the namespace template to get you started.

You will jump **straight to the edit page**, and please... remember to give your workshop a unique name!

Once the prototype stage is finished you can let an admin know and we can move the workshop to its own proper page in the relevant [workshops](#) namespace.

HtE Prototypes

- [Ant Keeping](#)
- [Brick Battle Bots](#)
- [Introduction to Neopixels](#)
