IDEA: Laust's Adventure into NodeOS

IDEA: Laust's Adventure into NodeOS

prev: lausts_adventure_into_node_os_and_cross_compilation I am interested in having the same minimal custom operating system on platforms such as the raspberry pi and intel,

At the moment I am using Ferora 27 and various rawhide LLVM 6.0.0 packages to enable Emscripten to produce runnable web assembly modules on as many architectures as possible
