

X-Carve

SLQ Wiki Fabrication Lab 2026/01/24 02:13

X-Carve

Originally a Shapoko 2 with X-Carve upgrade kit, the final machine has a guaranteed usable area of 700x700x50mm

It can take 1/8", 1/4" or 6mm bits and has a spindle speed between fast and way too fast.

Software is Vetric VCarve Pro for toolpath generation and Candle for machine operation.

Technical

Mechanical, Electrical and Software summery and detail for machine repair and upgrades.

Operations

Documentation for both staff and final users
