One Eye

This is the story of how the One Eye came to life!

Imagined

Original Well submission [here!](#)

This is a thing imagined by **Mohammad**, aged 11, on Tuesday May 11

The full name of this thing is: **One Eye**

It can be found in: **Asia, Hong Kong**

It is known that: **One eye was in my imagination destroying a city destroying the buildings with a laser beam coming out of his eyes, missiles exploding from his leg**

The original sculpture of One Eye:

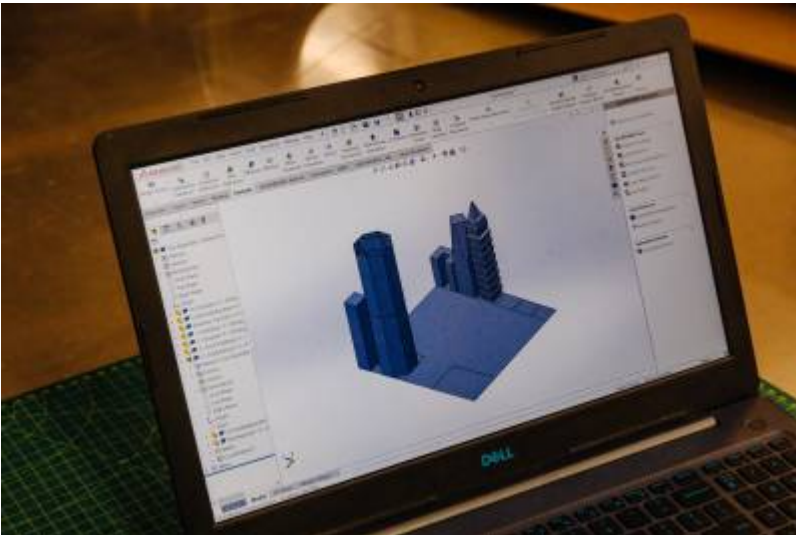

A recording One Eye can be found here:

Designed

The Design Journey: The process for QCA Design students was to do a solo exploration of the Imagined Things in the well, select a favourite and then create a design pitch and scale model to present to their peers. Pitches were then voted on and One Eye was selected as the Imagined thing to fabricate! Students then split into groups to design and fabricate in sections. Students used digital design tools, such as SolidWorks, Sketch Up and AutoCAD to 3D model and design One Eye and the Cityscape.

The Fabrication Journey: students worked independently to fabricate One Eye and the Cityscape. A combination of fabrication methods were used including the beam method as well as hand, CNC and Laser cutting and assembly. There was lots of communication between the groups to ensure the scale and finish was consistent and that the pieces of One Eye would fit together on assembly.

Made

Griffith University's QCA Design students- Gold Coast
