# Laser cut ornaments

Ellie Dumgian, 2023

## Workshop presentation

The Laser cut ornaments workshop has been created into a slide show for presentation and documentation purposes. Please feel free to download and use the guide and files as per our CC license in the footnote.

Some pages may link to other online workshops, tutorials or guides created at The Edge, you may require the internet to connect and view links.

## Acknowledgement

We acknowledge Aboriginal and Torres Strait Islander peoples and their continuing connection to land and as custodians of stories for millennia. We respectfully acknowledge the land on which we all meet today, and pay our respects to elders past, present and emerging.

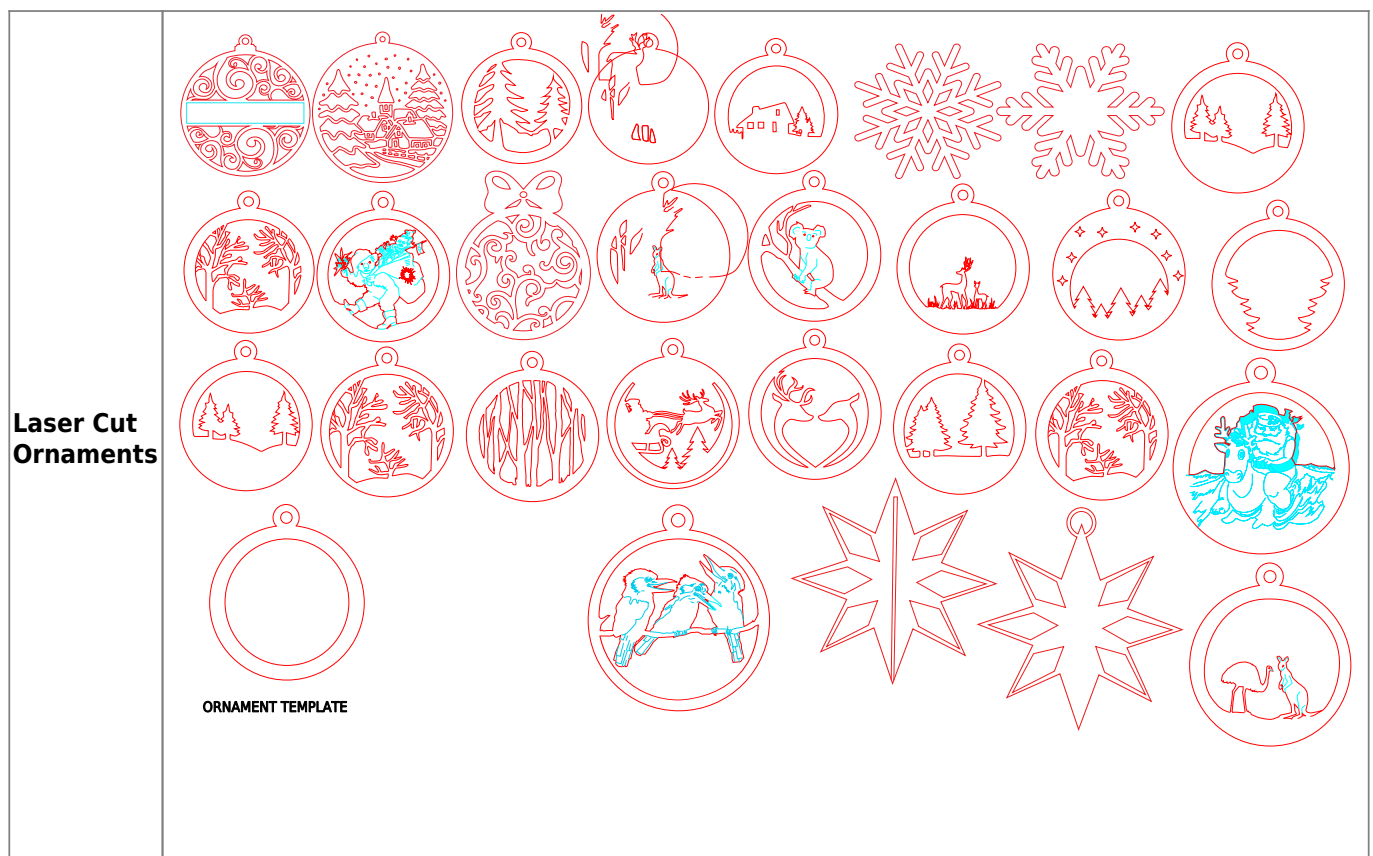

# Summary

Be inspired by holiday-themed images from the state library collection or select free-to-use vectors to create your own unique ornaments. Learn about the creative process by using Inkscape to create vectors and prepare the design to be cut on the laser cutter. You will get to design your own two ornaments (minimum) for cutting on the laser cutter by your workshop facilitator. If you're not too confident in your computer design skills, there are many designs to choose from below to make up your personalized paper holiday designs.
