Plant UR Cup

Summary

I saw this [img_7414.jpg](#) one day at my local and asked what they did with the cups? They used them to grow seedlings. I thought that this could be a thing we did in the Coffee Stop. Set up a station on Level 1 of the Edge, somewhere by the coffee stop, where patrons could plant a seed or seedling into their empty coffee cup and take it home with them. It could be something productive ([ediblehttp://www.prettyproduce.com.au/about](http://www.prettyproduce.com.au/about), attract pollinators

, air filtering(https://en.wikipedia.org/wiki/NASA_Clean_Air_Study)

This could

- be a brief 3min activity that patrons could engage with upstairs
- a way getting people to think about their rubbish
- a hands on way of recycling/ upcycling
- an opportunity for people to learn the rarely* practiced technique of planting a seed (Urban people don't plant stuff)
- something to take home and talk about
- there could be a didactic about the productive nature of the plant

Activity Summary

Describe the activity being proposed and the engagement, skills and knowledge development value of this type of activity.
