Prototype Workshops

We use this section to document the development of prototypes workshops. Once a workshop is prototyped, it can be delivered as a trial, then is released as a [public workshop](#), or moved back to prototypes.

Completed Prototypes

Workshops that are complete, but have not been approved for public publishing.

New Workshops

To begin development start by making a new page in the box below. This will make a new page in this namespace, and it will use the namespace template to get you started.

You can also view a template here [Workshop Template](#)

You will jump **straight to the edit page**, and please...
remember to give your workshop a unique name!

Once the prototype stage is finished you can let an admin know and we can move the workshop to its own proper page in the relevant [workshops](#) namespace.
