Trial Workshops

Trial Workshops

Trial Workshops fit under the planning content type.

These workshops may have been delivered fully developed as part of The Edge's public programming, run externally, tested as try-its or used as in-house experiments. Workshops will either 'graduate' from the trial section to the public section, be further developed here as trials, or moved back to prototypes.

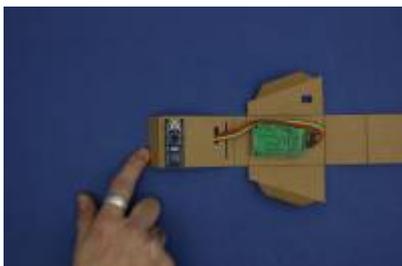

AR Design Online

A online workshop focused on augmented reality, including an introduction into animation with Krita.

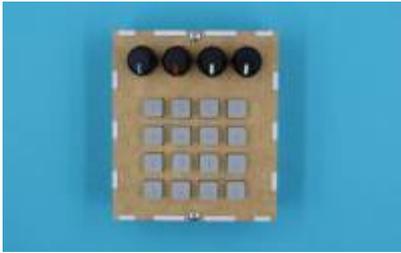

Badgeduino

Learn to make a wearable electronic badge using an Arduino.

Deskduino

Learn to make an electronic display for your workplace/desk using Arduino.

[MIDI Controller](#)

An intermediate approach to creating a MIDI controller for your computer.

[Podcasting Online](#)

A series of 3 online workshops focused on Podcasting from concept to production.
