LEEDR Multi Touch Hub

The LEEDR Multi-Touch hub is in league of its own when it comes to a fun, dynamic and engaging STEM device. The hub contains a wide range of apps and the ability for libraries to add their own media content, such as PDFs, video and photos. With its huge 55-inch touch display the Multi-Touch hub can easily engage up to 6 participants collaboratively.

Included in the package is an-abundance of STEM resources which support rich learning experiences of 3D and virtual reality. The literacy resources are curated and linked to the Australian Science and Mathematics Curriculum and supports implementation of the Digital Technologies Australian Curriculum to improve literacy and numeracy outcomes.

The hub is versatile, with any works created on board able to be saved, shared and emailed anywhere. The unit simply needs a power source and internet connection, so has the mobility to suit the requirements of your space.

The hub's flexibility doesn't end there, also having the ability to attach additional devices and functionality such as an HTC VIVE VR headset, educational VR content through LEEDRs partner Lifelique, and 3D printers to turn virtual objects into reality.

Recommended Ages	All ages
Product Cost	Starting at \$18,000 with 3-year rental options available
