Youth Engagement for One Last Apocalypse

A number of organisations that work with youth can be engaged in the process of OLA. For The Edge it was a local Flexi School.

Youth Engagement in Deception Bay

There were 2 youth groups identified to engage in the program- the Flexi school and the PCYC. Both were engaged in different ways. Below are the different workshops that happened.

Mask making: [Mask Making](#)

Youth Engagement at The Edge

The Edge worked with Albert Park Flexi school to tailor an ongoing engagement. It began at the Flexi school with a game and then moved onsite to The Edge with a range of inter-generational inductions. The group then used these skills to help make the physical design of cardboard kaiju as well as the sound design. The group changed each week with two young people being consistent throughout the program. Some of these programs were then deployed with the Deception Bay Flexischool.
