

858D+ Hot Air Reflow Station

SLQ Wiki Fabrication Lab 2025/07/08 16:12

858D+ Hot Air Reflow Station

This is a clone of the ATTEN 858D+.

Recommended Temperatures

- Heat shrink: 150 °C
- Solder: 350 °C

NOTE: These stations have a 'cool down' function that keeps the fan running until the head is below 100°C to protect the elements even when back in it's holder.

It will turn off automatically after a short amount of time.
