

3D PRINTING INDUCTION PRESENTATION

SLQ Wiki Fabrication Lab 2025/07/09 00:16

~~REVEAL~~

3D PRINTING INDUCTION PRESENTATION

For the...

Prusa i3 Mk3s

In this induction you will learn

- the safe efficient operation of a 3D Printer
- what you can achieve with a 3D Printer
- a basic intro to designing for 3d printing TinkerCad
- how to prepare a simple design for printing.
- how to identify problems and what to do when problems occur.

Requirements

- A [State Library of Queensland Patron Account](#).
- Closed footwear.
- Participants must be over 16 years of age
- 3D Printing Assessment paperwork (supplied)

Prusa i3 MK3s+

The Prusa i3 MK3s+ is a successor to Original Prusa i3 MK3 with hardware and software upgrades which lead to improved reliability and ease of use and assembly.

The Edge purchased 5 Prusa i3s printers to replace the ageing Up mini 2s.

Summary

- Build volume – (250(W) x 210(D) x 210(H) mm (11,025 cm³)
- 0.4mm nozzle
- PEI print surface

FILAMENT MATERIALS

In theory, the Prusa i3 Mk3s+ can be set up to print using a range of filaments including:

PLA	Polylactic acid (Starch based)
ABS	Acrylonitrile butadiene styrene
PETG	Polyethylene terephthalate (Glycol modified)
Nylon	Polyamide
Composite Materials	Often PLA with carbon fiber, metal or wood fill

HIPS	High-impact polystyrene
PVA	Polyvinyl acetate (Water-soluble Print support)
PP	Polypropylene

In practice, we control the types of filaments permitted for printing, due to the emissions they produce when melted. For the full range, see: [Supported Filaments](#)

3D printing operations

Below describes guidelines for coordinating public access of the 3D printers.

Prusa i3 Mk3s Components

Prusa Slicer

Prusa Slicer is the version of 3d Slic3r adapted for the [Prusa i3 MK3S](#)

Prepping your 3d model for printing

- 1 Open the **PrusaSlicer**  application. If you are prompted that a Configuration Update is available, click to install the update before proceeding further.

2	Use the Add  button to load models into PrusaSlicer
3	Delete  Delete All  buttons remove the model(s) from PrusaSlicer opens the detailed settings of print , filament and printer
4	Use Move ,  scale ,  rotate  , Place on Face  and cut tools  to prepare the model to printing in the most efficient/ effective orientation,
5	Select a Quality / Speed setting for your print 
6	Material selection (on Fabrication Lab computers, only filament brands/polymers provided in the Lab will appear in the dropdown list) 
7	Select a Supports setting 
8	Select an Infill percentage 
9	Click Slice  to <i>slice</i> the model into layers in the Z axis and select layers preview  to view infill land

10	Sliced Info <table> <tr><td>Used Filament (m)</td><td>13.34</td></tr> <tr><td>Used Filament (mm³)</td><td>32097.11</td></tr> <tr><td>Used Filament (g)</td><td>29.80</td></tr> <tr><td>Cost</td><td>0.60</td></tr> <tr><td>Estimated printing time :</td><td></td></tr> <tr><td>- normal mode</td><td>5h 29m 5s</td></tr> <tr><td>- stealth mode</td><td>5h 31m 15s</td></tr> </table> Check the Sliced Info for the cost and how long its going to take to print before exporting your gcode <i>The Edge charges 15cents / gram and your print needs to be finished before the Lab Closes - talk to the Fab Lab Supervisor if you have a long job you'd like to do .</i>	Used Filament (m)	13.34	Used Filament (mm ³)	32097.11	Used Filament (g)	29.80	Cost	0.60	Estimated printing time :		- normal mode	5h 29m 5s	- stealth mode	5h 31m 15s
Used Filament (m)	13.34														
Used Filament (mm ³)	32097.11														
Used Filament (g)	29.80														
Cost	0.60														
Estimated printing time :															
- normal mode	5h 29m 5s														
- stealth mode	5h 31m 15s														
11	Generate and export gcode to the SD Card by clicking the Export G-Code button Export G-code														
Hint	Right-click on model opens a context menu														
Hint	Switch between 3D editor and Layer Preview by clicking  &
