

Information Kiosk

SLQ Wiki Fabrication Lab 2024/09/19 05:22

This is an archived page , no further development is anticipated

Information Kiosk

Developed to fulfill in-house information presentation requirements for facilitated and stand alone use. Based on the [signage player v5](#) with added optional functionality of an external bluetooth controller.

Components

Player

The player displays a web-slideshow which can be navigated using buttons. The player can be powered-off and reset.

Functions

controller

Display Content Management System (CMS)
