The Isaac Libraries Lego Challenge is a program that runs over ten weeks from June 17 2019 – September 6 2019 (no sessions during school holidays). This program is a challenge to improve your coding, problems solving and teamwork skills. Please read the attached Challenge Behavioural Standards and respond to the below questions to assist staff in building teams and planning sessions. Teams are limited in numbers and participants must be aged 9-16 years at the start of the challenge. We ask that you answer the below questions to give staff an idea of who you are and what it is you like about coding and robotics.

The Lego Robot Game is designed for you, the participant to do all the design, building and coding. Community mentors, library staff and parents will be there for support and guidance. It can be scary, frustrating and confusing to begin with but if you listen to your mentors/ library staff and parents as well as do your homework tasks in the first few weeks you will find that you will start achieving goals and targets. You will be able to meet new people and make new friends.

In the final week Tech Fest will be held and it is here you will be able to showcase all you have learnt. You will have 3 or 4 runs (dependant on total teams attending) on the day to run as many codes as you can in 2 ½ minutes. You will get to see how other teams have gone about completing the tasks, exchange tips and ideas. You will also be able to check out what other tech and gadgets Isaac Libraries have.

TELL US WHY YOU WANT TO JOIN A LEGO CHALLENGE TEAM (APPROX 100 WORDS)

WHAT DO YOU THINK MAKES A GOOD TEAM
