

**Greetings! And welcome to your new home, Sigurnost!**

**My name is ARTIFACT, and I will be your caretaker in your new life here in the city!**

Now, I am well aware that each of you have lost your homes in the old city's destruction, but I Know that you will feel happy, and safe here under my watchful protection.

I have created a signal jamming system that will prevent the villain that destroyed brigdon from committing similar atrocities here, so you may rest easy in the knowledge that you are safe.

Naturally, Sigurnost has laws, I believe you will find them to be tough, but fair. Here is a short overview;

- ❖ Every citizen must be accounted for at all times. Please report regularly to local check-in stations to alert me of your location.
- ❖ Some of you have been elected, by me, to be public safety officers. Please follow their instructions at all times.
- ❖ All articles of clothing must be approved by myself before they may be worn. They must contain no pockets, or other places where small, potentially dangerous objects may be concealed.
- ❖ No unapproved works of art may be displayed publicly especially in cases where they may cause unhappiness among some residence, or promote unsavoury behaviour.
- ❖ Groups of citizens exceeding 5 participants, must be accompanied by a safety officer, until such a time that the group dispurses.

A complete list of laws can be found in your personal Sigurnost safety manual.

Breaking of any law will be dealt with harshly by safety officials.

To ensure a safe and tranquil stay for everyone in Sigurnost, please obey all laws, thank you, and enjoy your life in Sigurnost
